VENTURES SHINTECH SWITCHGEAR

SHINTECH Switchgear was established with a clear and simple vision to provide the electrical industry with alternative quality electrical products. We understand the electrical industry and support its future growth. That is why we commit to product improvement processes, and Research and Development of new products each year.

SHINTECH Switchgear has been developing imaginative solutions in power distribution and motor control. We have built a reputation for excellence in design, workmanship and performance which serves as a benchmark for industry.

As industry leader, SHINTECH Switchgear has been developing leading edge designs since the inception of the switchgear industry, the latest result of which in recent years in the completely new switchgear design. we specialize in reliable, high performance switchgears.

Why Shintech Switchgear?

ADVANTAGE

Where our customers are, when they need us

“Shintech is intimately acquainted with the comings and going of local industry”

This makes our local staff founts of knowledge about local issues, such as industrial relations laws, safety standards, legislated electrical standards, market prospects, planning restrictions and anything else they may need to know about operating in their areas.

As well as offering extensive local knowledge, each of those operations remains intimately connected with the rest of Shintech. This enables the free sharing of knowledge, expertise, skills and other resources so our customers receive the support they need, when they need it. If your project spans states or requires other specialised local knowledge, odds are that our experts can provide it or quickly find it for you.

TESTING

To many, the standards which set out the minimum performance required of switchgear are interpreted as their maximum requirement. To Shintech Switchgear, the standards are the minimum benchmark to build on for true reliability and performance. We strive to meet the underlying intent, not just the basic requirement, aware that its customers seek more than just a minimum cost solution.

Our Factory is located in Abu-Dhabi, UAE incorporate advanced in-house test facilities to ensure our products are routinely checked during the development and manufacturing process.
